

Bonny Ejuh

Environment and Sustainability Committee

I am writing to express my interest in joining the environment and sustainability committee of the BCS as a Resident Doctor Representative.

I am strongly committed to cardiovascular medicine and environmental stewardship, in particular the strong relationship between climate change and cardiovascular medicine.

The impact of air pollution and extreme temperature on cardiovascular disease is evident. I am enthusiastic to contribute initiatives that address these challenges both at the clinical and systemic level.

I am motivated in advancing sustainable clinical practices within cardiology and I am very keen to engage trainees in this agenda. I would support initiatives such as trainee led sustainability quality improvement projects aimed at reducing unnecessary investigations and waste, encouraging the initiation of 'environmental advocate' roles within cardiology teams and integration of sustainability themes into Journal clubs. I believe these approaches will encourage and embed sustainability thinking in our everyday clinical practice.

I am keen to contribute in the committee's development of structured educational programmes on sustainable healthcare, encouraging multidisciplinary collaboration across clinical and non-clinical teams and support low-carbon care pathways, digitalization and environmental sound procedures.

I am eager to embrace the opportunity to contribute to the Committee's ongoing work and to collaborate with colleagues who are committed to shaping an Eco-friendly future for cardiovascular medicine.

Thank you for considering my expression of interest statement.
