

Rithik Mohan Singh Sindhi

Clinical Standards Committee

I'm a ST5 Cardiology Registrar based in Belfast. Attending the BCS-Mayo Conference in March 2026 reinforced my commitment to national society engagement. Hearing world-platform science discussed alongside practical clinical questions reminded me that the BCS is where evidence and practice meet and that Northern Ireland voices are underrepresented in that conversation. My motivation to join the Guidelines and Practice Committee stems from a recognition that evidence-practice gaps in interventional cardiology are often invisible until someone examines real-world data carefully. I am very keen to grow personally and professional in such an acquaintance. I would be honoured to contribute to the BCS at committee level and to represent the Northern Ireland interventional community within the Society.
